-2-

Bacteriological Warfare Training

4. There was no BW training in the military forces.

Radiological Warfare Training

5. There was no AW training in the military forces. There was a meeting in 1948 in Cluj at the Faculty of Science (Facultatea de Stiinte) at which atomic energy was discussed, but, to my knowledge, this was the only interest ever shown by Rumania in the atomic bomb. The military forces had no individual research institutes, nor was there a research section in the military command.

MAI Physicians

6.	The Ministry of the Interior (Ministerul Afacerilor Interne MAI)
	had an army of its own, independent of the Ministry of the Armed Forces (Ministerul Fortelor Armate MFA). The MAI consisted of
	two sections the Securitates Poporului which was a secret service type
	organization designed to maintain control of political trinking in the
	country, and the MAI Army, which resembled the MVD of the USSR, and was responsible for border patrol and internal policing by armed
	units. This MAI Army had its own physicians.
